- Richmond, NY

EDUCATION

2010 - 2013

ROCHESTER INSTITUTE OF TECHNOLOGY

- Bachelor's of Computer Science

TECHNICAL SKILLS

- Frontend:** React, Vue, Angular, HTML5, CSS3, JavaScript, TypeScript
- Backend:** PHP, Laravel, Yii, Symfony, Node.js
- Databases:** MySQL, PostgreSQL, MongoDB
- Tools & Technologies:** Git, Docker, AWS, RESTful APIs, GraphQL, Webpack, Jenkins
- Other:** Agile methodologies, Scrum, Unit Testing, Continuous Integration/Continuous Deployment (CI/CD)
- CMS Platforms:** Strapi, Joomla, Drupal, Wordpress, Web Flow, Wix, Magento, Shopify, Squarespace, Hubspot, Sitecore

PROFESSIONAL SUMMARY

Experienced Full Stack Developer with over 10 years of expertise in developing dynamic and responsive web applications. Specialized in frontend development using JavaScript frameworks such as **React, Vue, and Angular**, and proficient in backend development with PHP frameworks like **Laravel, Yii, and Symfony**. Adept at managing the full software development lifecycle, from initial concept through deployment and optimization. Proven track record of delivering high-quality solutions in both corporate and freelance environments.

PROFESSIONAL EXPERIENCE

ACCENTURE

2020 - Present

Accenture | Full Stack Developer

Company Overview:

Accenture is a global professional services company with leading capabilities in digital, cloud, and security. Accenture offers Strategy and Consulting, Technology and Operations services, and Accenture Song—all powered by the world's largest network of Advanced Technology and Intelligent Operations centers

Responsibilities:

- React Development:** Utilized React to develop scalable web applications, ensuring high performance and maintainability.
- Mobile-First Approach:** Implemented a mobile-first approach to optimize existing websites for better performance on mobile devices.
- API Integration:** Effectively integrated data from various back-end services/APIs to enhance functionality.
- CSS and JavaScript Libraries:** Employed advanced CSS techniques and JavaScript libraries to create adaptable and modular templates.
- Collaboration with Designers:** Worked closely with UX/UI designers to ensure efficient and technically sound designs.
- RESTful Web Services:** Developed REST architecture-based web services for seamless client-server communication.
- Feature Implementation:** Used HTML/CSS and JavaScript to implement new features and functions on websites, leveraging frameworks and JS libraries such as React/Redux, Vue, JQuery, JQuery UI, and JQuery Mobile.
- Backend Integration:** Integrated Node.js for backend development and RESTful API creation.
- Vue.js and Vuex:** Built frontend applications using Vue.js and Vuex, managing complex state efficiently.

CERTIFICATIONS

- Certified Scrum Master (CSM)
- AWS Certified Solutions Architect
- Google Mobile Web Specialist

- **CSS Frameworks:** Utilized Bootstrap, Material UI, and AntDesign as CSS frameworks to accelerate development.
- **Project Documentation:** Prepared essential project documents like test cases and coding guidelines.
- **Unit Testing:** Used PHP Unit, Jest, and Enzyme to write unit tests, ensuring code quality and reliability.
- **CI/CD Pipelines:** Built CI/CD pipelines and deployed applications using AWS pipelines and GitHub actions.
- **Containerization:** Set up applications using Docker/container environments for consistent and scalable deployment.
- **PHP Frameworks:** Worked with PHP frameworks such as Laravel to develop robust backend solutions.
- **Programming Languages:** Proficient in JavaScript, HTML5, CSS, SQL, MySQL, ReactJS, and NodeJS.
- **CMS Platforms:** Experienced with various CMS platforms, including Strapi, Joomla, Drupal, WordPress, Webflow, Wix, Magento, and Shopify.

UBER

2018 - 2019

Frontend Developer

Company Overview:

Uber is a global ride-sharing company that connects riders with drivers through a mobile app. It is one of the most recognizable brands in the world, known for its innovative approach to transportation and logistics.

Responsibilities:

- Developed and maintained the user interface of Uber's web applications using Angular and React, ensuring a seamless user experience.
- Worked closely with UX/UI designers to translate design mockups into responsive, interactive features.
- Implemented state management solutions to handle complex application states efficiently.
- Ensured cross-browser compatibility and optimized web applications for mobile devices.
- Participated in code reviews and contributed to the improvement of development processes.
- Implemented responsive design principles to ensure applications were mobile-friendly and accessible on all devices.
- Utilized CSS preprocessors like SASS and LESS to write modular, maintainable stylesheets.
- Performed extensive testing across different browsers and devices to ensure consistent user experience.
- Collaborated with backend developers to define and consume RESTful APIs.
- Followed Agile methodologies and participated in daily stand-ups, sprint planning, and retrospectives.
- Optimized web applications for maximum speed and scalability.
- Implemented lazy loading and code-splitting techniques to improve application performance.
- Utilized testing frameworks such as Jest and Enzyme to write unit tests and ensure code quality.
- Debugged and resolved complex issues in both development and production environments.
- Created and maintained technical documentation for codebase and development processes.
- Provided technical support and guidance to junior developers and new team members.

KEY COMPETENCIES

- Website Speed Optimization
- Web Accessibility
- SEO Friendly
- Mobile Responsive
- Cross Browser Testing
- Quality Focused
- Fast Learner
- Website Security

CRITICAL MASS Web Developer

2014 - 2017

Company Overview:

Critical Mass is a global digital experience design agency that focuses on creating engaging and transformative digital solutions for brands. With a data-driven approach and a commitment to creativity, Critical Mass helps clients navigate the digital landscape and achieve their business objectives.

Responsibilities:

Frontend Development:

- Developed custom HTML/CSS and JavaScript code for web applications.
- Enhanced user experience and achieved webpage objectives through site structure, navigation, page optimization, and graphic integration.

Backend Development:

- Integrated data from multiple back-end services and databases.
- Utilized PHP frameworks such as Laravel, CodeIgniter, and CakePHP for custom projects.
- Built backend applications using PHP, .Net, and MySQL.
- Worked on Node.js and CodeIgniter to build web applications.
- Proficient in MySQL for database management, including views and stored procedures.

WordPress Development:

- Built new WordPress websites and various full-stack projects.
- Created custom WordPress themes, plugins, and shortcodes, using hooks, database queries, and AJAX data handling.

Debugging and Optimization:

- Debugged existing websites and implemented enhancements to improve functionality and speed.

CMS Solutions:

- Skilled in designing and maintaining corporate and client websites, using scripting languages and content management systems like WordPress.
- Worked on different CMS solutions like Drupal, Magento, OpenCart, and Joomla.

Migration and Integration:

- Migrated websites from server to server.
- Integrated third-party services in websites, from carts to learning systems.

Technologies and Tools:

- Implemented PHP, Bootstrap, JavaScript, and jQuery.

Client Collaboration:

- Collaborated with clients and stakeholders to create technical solutions for business needs.

SOFT SKILLS

- **Strategic Planning:** Ability to set project goals, define scope, and create detailed plans for successful project execution.
- **Team Leadership:** Skilled at leading cross-functional teams, fostering collaboration, and ensuring alignment with project objectives.
- **Time Management:** Proficient in scheduling, prioritizing tasks, and managing timelines to meet deadlines.
- **Risk Management:** Experienced in identifying potential risks, developing mitigation strategies, and ensuring project continuity.
- **Budget Management:** Competent in managing budgets, tracking expenses, and ensuring cost-effectiveness.
- **Communication:** Strong skills in stakeholder engagement, progress reporting, and conflict resolution.
- **Agile Methodologies:** Experienced in Agile practices, including Scrum and Kanban, for iterative and efficient project delivery.
- **Quality Assurance:** Committed to maintaining high standards through continuous monitoring, testing, and quality control measures.
- **Problem-Solving:** Adept at troubleshooting issues, making informed decisions, and maintaining project momentum.
- **Tool Proficiency:** Proficient with project management tools like Jira, Trello, Asana, and Microsoft Project for effective project tracking and management.

PROJECTS HIGHLIGHTS

MY HEALTHILY

<https://myhealthily.com>

Developed a comprehensive healthcare solution platform for small business owners using React and Laravel, providing seamless access to healthcare options.

RESTORE HYPER WELLNESS

<https://www.restore.com>

Created a user-friendly platform combining science and expert guidance for proactive body optimization, utilizing Vue.js and Node.js.

STAY TUNED

<https://staytuned.digital>

Developed software to accelerate DTC brands, focusing on results-driven solutions and merchant support, using Angular and Symfony.

IIFYM

<https://www.iifym.com>

Built a macro tracking and weight loss platform with real-time calculators and informative blog posts using React and Laravel.

SAPIAT

<https://sapiat.com>

Developed a forecasting platform for informed investors with realistic scenario simulations, using Vue.js and Laravel.

DOSSIER

<https://dossier.co>

Created an e-commerce platform for affordable luxury perfumes, ensuring high performance and user satisfaction with Shopify.

NIELSEN, WORKFLOW MANAGEMENT SYSTEM

Workflow Management System was created for the Operations team where the onboarded clients get further in the process. This system contains checklists of tasks with start and end dates and an assigning system. The dashboard allows the users to see assigned projects, checklists, and tasks involved. This system also contains messaging and notifications to communicate and update the users about the activities. Cron Job system generates emails for the Operation leads to report to them a summary of project daily activities.

Technologies:

ReactJS, NodeJS, Express, Sequelize, MySQL, AWS, Git, Jest
